FIND YOUR FLAVOR

This chart locates a variety of Schlafly beer according to three different characteristics; beer family, color of the beer and the balance of sweetness and bitterness.

The Families of Beer

The world's beer styles can be divided into two great families according to the yeast that produce the alcohol: ales and lagers.

Color

Both lagers and ales can span from the palest straw-gold to opaque black. The color in beer comes from the range of barley the brewer selects.

Sweet-to-Bitter

Malted barley contributes sweetness to beer; hops add aroma and bitterness.
